

The BBGC2 100 AH 12 Volt LiFePO₄ Battle Born Battery

The highest quality and safest lithium ion technology at the fairest price on the market.

Built-in Battery Management System

- 100 Amps Continuous
- 200 Amps Surge for 30 Seconds
- ½ Second Surge for Larger Loads
- High/Low Voltage Protection
- Short Circuit Protection
- High/Low Temperature Protection
- Automatic Cell Balancing
- Dimensions (L x W x H):
10.32 x 6.86 x 11

This battery is a drop in replacement for a GC2 lead acid battery. Making it easy to upgrade the battery bank in your RV or boat. If you are using 6-volt GC2 lead acid batteries, this is the first ever 12 volt lithium ion deep cycle battery built in the same foot print.

Weighing in at a sleek 30 lbs, the 100 amp hour, 12 volt Battle Born Battery runs circles around the competition. The Battle Born Battery also requires no new hardware to run in your boat, RV, trailer, or golf cart. Just pull out that grungy old lead acid battery (use two hands, those suckers are heavy), drop in this elegant upgrade, and get yourself out there.

All Battle Born Batteries are assembled in Reno, Nevada, USA.

Eliminating Battery Anxiety with This Game Changing Battery Technology

Lithium Upgrade and Install Tips

- Consult with your battery supplier or dealer to confirm compatibility with your system components, including converters, solar charge controllers and inverter chargers.
- Only purchase lithium batteries that have a Battery Management System built in.
- Choose a supplier that only sources cells from UL manufacturing sources.
- Confirm that your new battery bank can handle the loads of your RV before buying it.
- Keep your lead acid starting battery in your motorized RV.
- Properly recycle your old lead acid batteries.

FAQs

Where are your batteries made?

All of our batteries are designed and assembled in Reno, NV, USA.

Will this battery fit in the same spot as my current battery?

Yes. We have multiple sizes that will drop right into most systems.

Are your batteries safe?

Yes. All of our batteries have a built-in battery management system to protect against fault conditions. We also only use LiFePO₄ cells, which are the safest and most stable types of lithium cells.

Benefits

- At least double the power in the same physical space of lead acid.
- Can be discharged 100% vs lead acid recommended 50% depth of discharge.
- Can be installed indoors with no hydrogen gases generated, also no terminal corrosion.
- About 1/5 the weight of a lead acid battery, resulting in a significant weight reduction over your current battery bank.
- Output voltage is flat during most of the discharge cycle, increasing efficiency of your system.
- Can be charged up to 5 times faster than lead acid.
- Last 10 times longer than lead acid.
- Holds a charge for up to 1 year (without a load) without the need for a trickle charger.
Great for unattended storage.
